Future Challenges

The Department of Land Management (DLM) has accomplished many tasks within FY 2014 considering that at one point DLM was staffed with a little over one hundred personnel. At the conclusion of FY 2014 DLM staffing level was forty-six.

As the department continues to exercise prudent and cost-effective spending practices, it also faces the challenges and realization of seeing its information technology (IT) hardware equipment meeting its useful life expectancy. These hardware equipment comes at a price tag and is heavily relied upon to keep the department's automated network system continually operational with its land information data constantly made available for public access. With the continuing growth, more documents are being recorded on a daily basis which translates to data being inputted and scanned for use.

Furthermore, the availability of financial resources has been DLM's largest challenge. The result is, DLM being unable to recruit needed personnel to meet its mandates in the following areas:

- ◆ Land Administration Division
- ◆ Land Planning Division
- ◆ Land Records Division
- ◆ Land Survey Division

Without the additional personnel for the above divisions, DLM will continue experiencing delays fulfilling its numerous mandates effectuated by law. This will have an adverse affect on the day-to-day operations today and in the future. Then there's Advisory No. 9 that merged the Chamorro Land Trust Commission (CLTC) and Guam Ancestral Land Commission (GALC) under the management of DLM. While CLTC and GALC was merged the duplicate efforts and operational efficiency was to be realized in order to reduce redundancy. This also made it more of a challenge due in part to correcting inefficiencies discovered of the organizations practices of the past. Again, while CLTC and GALC were audited for FY 2014, they continue to face insurmountable challenges in approving rules and regulations to ensure the integrity of the Trust and Ancestral's Commissions are upheld.

The pending military build-up is another challenge that will greatly affect DLM. With the anticipation of many land transactions that will occur, our Land Planning Division is largely understaffed and faces influx Guam Land Use Commission applications. The process already saturated, tells you DLM will experience high demands to expedite GLUC applications as development begins. Construction of many buildings will inevitably place a high demand on the department staff. With the existing manpower level, we will continue striving to ensure the process is moved in a timely manner and preserve the integrity of the process.

Despite these manpower and budgetary constraints, the department is optimistic in its pursuit of using technology to advance its efforts to be more efficient and productive for our customers.
